* [to age 85] means that the premium shown, if paid when due, will keep the policy in force to age 85 on the worst-case basis, assuming no policy changes, loans, or partial surrenders are made. Other premium/face amount scenarios may provide you more or less death benefit per \$1.00 of premium. Your agent can assist you with your decision on the premium amount and death benefit amount most appropriate to meet your insurance needs. Premiums may need to be increased in order to maintain life insurance coverage beyond age 85. If still in force, the life insurance policy will mature for the net surrender value on the policy anniversary on or next following the insured's 95th birthday.

† Premium is less than minimum premium allowed.

€ The face amount exceeds the CGI/GI limit for the issue age and smoking status.

*** The guaranteed net surrender values for the life insurance policy assume that premiums are paid monthly at the beginning of each month, that Future Purchase Option Rider (UFPR2) specified amount increases are exercised on each of the first five rider anniversaries, that death benefit option 1 is selected, and that no loans, partial surrenders, or changes in specified amount (not due to the increases by UFPR2 rider) or death benefit option occur. The net surrender values also assume that the semi-monthly premium increases by \$2.17 on each of the first five rider anniversaries, so that the planned semi-monthly premium in year six and later is \$10.85 more than shown. Guaranteed values are based on the minimum interest rate of 4.00% and maximum cost of insurance rates. Policy values are affected by actual interest rates credited to the policy and cost of insurance rates charged.

It is possible that coverage will expire when either no premiums are paid following the initial premium or subsequent premiums are insufficient to continue coverage.

This rate card is for forms UL21P, UL-LTCR1MO, UFPR2 and ULBR1, and is incomplete without corresponding brochures that describe the benefits, exclusions, and limitations of the forms. * [to age 85] means that the premium shown, if paid when due, will keep the policy in force to age 85 on the worst-case basis, assuming no policy changes, loans, or partial surrenders are made. Other premium/face amount scenarios may provide you more or less death benefit per \$1.00 of premium. Your agent can assist you with your decision on the premium amount and death benefit amount most appropriate to meet your insurance needs. Premiums may need to be increased in order to maintain life insurance coverage beyond age 85. If still in force, the life insurance policy will mature for the net surrender value on the policy anniversary on or next following the insured's 95th birthday.

§ IRS Regulations will not allow the planned periodic premium amount shown to be paid to maturity. Projected premiums have been reduced as necessary to comply with these regulations.
€ The face amount exceeds the CGI/GI limit for the issue age and smoking status.

*** The guaranteed net surrender values for the life insurance policy assume that premiums are paid monthly at the beginning of each month, that Future Purchase Option Rider (UFPR2) specified amount increases are exercised on each of the first five rider anniversaries, that death benefit option 1 is selected, and that no loans, partial surrenders, or changes in specified amount (not due to the increases by UFPR2 rider) or death benefit option occur. The net surrender values also assume that the semi-monthly premium increases by \$2.17 on each of the first five rider anniversaries, so that the planned semi-monthly premium in year six and later is \$10.85 more than shown. Guaranteed values are based on the minimum interest rate of 4.00% and maximum cost of insurance rates. Policy values are affected by actual interest rates credited to the policy and cost of insurance rates charged.

It is possible that coverage will expire when either no premiums are paid following the initial premium or subsequent premiums are insufficient to continue coverage.
